Backgrounds Folder Information

This folder contains some useful background graphics for students and teachers to use with Canvastic. Some are simple divisions for graphics and text. Others are helpful starters like the alphabet, numbers, fractions etc.

They can be inserted using the File Menu > Insert... command but are probably best put into the Background layer where they can be seen but not erased. Use the Format Menu > Background... command. Choose picture and locate this folder, then choose the background you wish to use.

Check the Canvastic website Idea Exchange page <http://www.canvastic.com/community/ideaexchange> for new backgrounds and template documents are posted.
