

Below is an image of the GS1 version of this product with the barcode and HRI objects included in the database form. A working demo of this product cannot be provided, because this would reveal the complete source code, which is only available in the purchased version. The purchased version is provided with a 30 day money back satisfaction guarantee. If it is necessary to test dynamic barcodes with this product, the purchased version is required.

The screenshot shows a web application interface for generating barcodes. At the top, there are navigation buttons (back, forward) and a record count of 1. Below this is a layout selector set to 'ProductForm' and a 'View As' button. The main title is 'IDAutomation.com Native Barcode Generator'. The form contains a 'Part Number:' label and a text input field containing '010950110102091717190508'. Below the input field is a QR code. Under the QR code, the part number is split into two lines: '(01) 09501101020917' and '(17) 190508'.
