

Hovitaga Report Generator

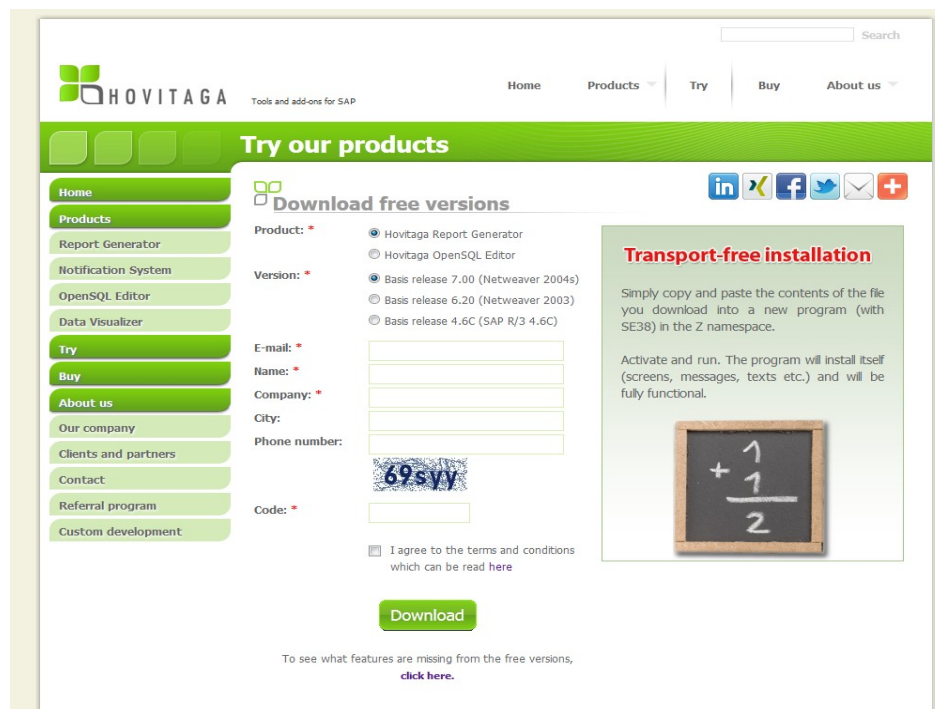

Free edition

Installation manual

Installation steps

1, Download the software

Go to <http://www.hovitaga.com/download> and download the source code. Select the product and version, fill the necessary fields and press the Download button.

The screenshot shows the Hovitaga website interface. On the left is a sidebar with navigation links: Home, Products, Report Generator, Notification System, OpenSQL Editor, Data Visualizer, Try, Buy, About us, Our company, Clients and partners, Contact, Referral program, and Custom development. The main content area is titled 'Try our products' and 'Download free versions'. It includes a search bar, social media icons, and a form to select a product and version. The 'Product' dropdown is set to 'Hovitaga Report Generator' and the 'Version' dropdown is set to 'Basis release 7.00 (Netweaver 2004s)'. Below these are input fields for E-mail, Name, Company, City, Phone number, and Code. A checkbox for 'I agree to the terms and conditions' is present. A green 'Download' button is at the bottom. To the right of the form is a section titled 'Transport-free installation' with instructions: 'Simply copy and paste the contents of the file you download into a new program (with SE38) in the Z namespace. Activate and run. The program will install itself (screens, messages, texts etc.) and will be fully functional.' Below this text is an image of a chalkboard with a simple addition problem: 1 + 1 = 2.

You will receive an email to the specified address containing the download link.

2, Open the downloaded archive and follow the included installation instructions.

If you have any problems with the installation, contact us at info@hovitaga.com
