KIDS netSAFE ACTIVITY CENTER

HOW TO EXIT APPLICATION

In order to provide safety and security to kids, parent must enter their password to exit the application. Please click on the "red x" button on the top right hand corner of the application. You will be prompted to enter you password, the application will then close if the correct password is entered.

HOW TO ADD FAVORITE WEBSITES

Once in the parent admin menu, you will have the option to add favorite websites that can be accessed from the main menu on the home screen. Click on the heart favorite icon to access the favorite links

HOW TO BLOCK SPECIFIC WEBSITES

The application allows you to block a website that you do not wish your child to visit. To block a website, from the parent menu please type in the address of the website you wish to be blocked. To save click on "save & close"

HOW TO DOWNLOAD 7 DAY WEB HISTORY

By clicking on the download history link from the parent admin menu, you may download a txt file to your computer. Browse the history your child has entered in the web address bar to see what websites they have visited and attempted to visit.

HOW TO ADD/REMOVE WEB ADDRESS BAR

Depending on your child's age you may want to prevent them from accessing any other websites other than the preloaded websites. You can accomplish this by checking/uncheck the hide web address bar in the parent admin menu.

POP-UP BLOCKER

KIDS netSAFE has a built in security measure to prevent children to be exposed any material that may not be appropriate. A pop-up blocker will prevent any and all pop ups from displaying while the application is open.

NO RIGHT CLICK

To prevent unauthorized access to censored material, KIDS netSAFE has restricted the right click feature in the application which under a normal browser, it would display additional browser features.

HOT KEYS DISABLED

PC computers allow you to pull up the computers admin features making exiting out of programs that are running quick and simple. KIDS netSAFE has disabled this feature to prevent the exiting of the application.

ADULT CONTENT BLOCKER

KIDS netSAFE has loaded thousands of the most common websites and phrases to prevent adult content from being accessed. A warning window will be displayed if such content is attempted and the child will be returned to KIDS netSAFE main menu.

If you have any questions on features or functions of the application or would like to request additional features on our next release please visit our support center and create a support ticket at <http://customersupportcenter.info>
