

# Stix

Think Hard. Think Fast.

**Terms of Use:** You are permitted to use and distribute this software freely, provided every file that was included in the download package is present and unmodified, except for modifications that result in the course of normal gameplay. The developer of the software waives all liability for any losses or damages that may occur, directly or indirectly, from the use and/or distribution of the software.

**Instructions:** If you haven't already done so, unzip Stix.zip. To play, Windows users simply run Stix.exe. All other users run Stix.jar using Java™ Platform Binary. Java SE 8 or higher is required to play. You can download Java 8 from <http://www.oracle.com/technetwork/java/javase/downloads/jre8-downloads-2133155.html>.

**Troubleshooting:** If you get the message “WARNING: Cannot save or load progress or scores!” this means that Stix is unable to read and/or write to its home directory. Make sure that you've unzipped Stix.zip, and that nothing else is preventing the ability to read/write to the Stix directory. Note that Stix will not start if the screen resolution is less than 760×570.

**Fan Page:** Like our [Facebook page](#) for tips, tricks, news, and information about updates, as well as to help spread the game, so that our population might think just a little bit harder and faster!
