Mindshare SWFExpire 1.1

SWFExpire sets an expiration date for your SWF. Add a custom message and optionally attach a MovieClip from the library upon expiration. Configuration options include setting a unique expiration date, message and visual styles. SWFExpire is extremely lightweight and adds very little overhead to your SWF files. To use the component simply drag an instance to the Stage, set its parameters in the Component Inspector and publish your SWF. SWFExpire is not a visible component so you can place it anywhere on or off the Stage.
